2014 SLAS Scientific Journals Honor Author and Reviewer Achievement

CHICAGO – The *Journal of Biomolecular Screening* (JBS) and the *Journal of Laboratory Automation* (JALA), both published by the Society of Laboratory Automation and Screening (SLAS) in partnership with SAGE Publications, hosted a special reception to celebrate the 2014 SLAS Journal Achievement Award honorees on Jan. 20 at SLAS2014, the Third Annual SLAS Annual Conference and Exhibition, Jan.18-22, 2014, in San Diego, Calif.

JBS Editor-in-Chief Robert M. Campbell, Ph.D., of Eli Lilly and Company, Indianapolis, Ind., and JALA Editor-in-Chief Dean Ho, Ph.D., of the University of California, Los Angeles, announced honorees in three categories, all of which are freely available (open access) at JBS Online (jbx.sagepub.com) or JALA Online (jla.sagepub.com).

Now in their 19th years of peer-reviewed publication, the *Journal of Biomolecular Screening* (JBS) publishes 10 issues per year and has an impact factor of 2.207; and the *Journal of Laboratory Automation* (JALA) publishes six issues per year and has an impact factor of 1.457. Both journals are published by SLAS in partnership with SAGE Publications. For more information about SLAS, JALA and JBS, please visit www.SLAS.org.

The Society for Laboratory Automation and Screening (SLAS) is an international community of more than 15,000 individual scientists, engineers, researchers, technologists and others from academic, government and commercial laboratories. The SLAS mission is to be the preeminent global organization providing forums for education and information exchange and to encourage the study of, and improve the practice of laboratory science and technology. *SLAS publishes two internationally recognized, MEDLINE-indexed journals. **The Journal of Laboratory Automation (JALA) and Journal of Biomolecular Screening (JBS)** uniquely serve laboratory science and technology professionals who work primarily in life science R&D. Together, JALA and JBS address the full spectrum of issues that are mission-critical to this important audience, enabling scientific research teams to gain scientific insights, increase productivity, elevate data quality, reduce lab process cycle times and enable experimentation that otherwise would be impossible.*

Specifically, JALA explores ways in which scientists adapt advancements in technology for scientific exploration and experimentation. In direct relation to this, JBS reports how scientists use adapted technology to pursue new therapeutics for unmet medical needs, including assay development, identification of chemical probes and target identification and validation in general.
